10^-5 to 10^-6
< 10^-6
biological_process
metabolic process
cellular component organization or biogenesis
cellular process
biological regulation
single-organism process
multicellular organism process
developmental process
biosynthetic process
organic substance metabolic process
nitrogen compound metabolic process
cellular metabolic process
primary metabolic process
single-organism metabolic process
cellular component organization
cellular process
regulation of biological quality
regulation of biological process
single-multicellular organism process
single-organism developmental process
anatomical structure formation involved in morphogenesis
anatomical structure development
organic substance biosynthetic process
cellular biosynthetic process
organic cyclic compound metabolic process
nitrogen compound metabolic process
heterocycle metabolic process
cellular nitrogen compound metabolic process
organelle organization
chromosome organization
single-organism organelle organization
transcription, DNA-templated
regulation of gene expression
regulation of nitrogen compound metabolic process
regulation of cellular metabolic process
regulation of primary metabolic process
regulation of macromolecule metabolic process
regulation of cellular process
regulation of cellular component organization
regulation of organelle organization
regulation of metabolic process
regulation of developmental process
cellular developmental process
pattern specification process
positive regulation of gene expression
tissue development
cell fate specification
cell fate commitment
embryonic pattern specification
axis specification
endoderm development
macromolecule biosynthetic process
cellular macromolecule biosynthetic process
RNA biosynthetic process
RNA metabolic process
nucleic acid metabolic process
cellular macromolecule biosynthetic process
DNA metabolic process
mRNA biosynthetic process
mRNA metabolic process
transcription, DNA-templated
ncRNA metabolic process
establishment of localization
localization
transport
establishment of protein localization
protein localization
establishment of protein localization to membrane
protein localization to membrane
regulation of establishment of protein localization
regulation of protein localization
regulation of establishment of protein localization to membrane
regulation of protein localization to membrane
regulation of transmembrane receptor protein serine/threonine kinase signaling pathway
positive regulation of cellular component organization
positive regulation of signaling
positive regulation of cell communication
positive regulation of signal transduction
regulation of signaling
regulation of cell communication
regulation of gene silencing by miRNA
regulation of gene silencing
regulation of gene silencing by RNA
regulation of organelle organization
negative regulation of cellular component organization
regulation of cellular component organization
negative regulation of protein localization
regulation of protein localization
regulation of primary metabolic process
regulation of cellular metabolic process
regulation of nitrogen compound metabolic process
regulation of macromolecule metabolic process
regulation of cellular process
regulation of cell differentiation
negative regulation of developmental process
cell fate specification
cell fate commitment
cell fate commitment involved in formation of primary germ layer
endodermal cell fate specification
embryonic axis specification
anterior/posterior axis specification
endoderm development
establishment of localization in cell
establishment of protein localization to membrane
establishment of protein localization to plasma membrane
establishment of protein localization to mitochondrion
establishment of protein localization to organelle
establishment of protein localization to chromosome
establishment of protein localization to plasma membrane
establishment of protein localization to mitochondrial membrane
establishment of protein localization to chromosome, telomeric region
establishment of protein localization to endoplasmic reticulum
establishment of protein localization to membrane
